About Gantner

Gantner is shaping the workplaces of tomorrow with intelligent, connected solutions for secure access, smart lockers, and flexible workplace concepts that seamlessly connect people, spaces, and technology.

Gantner – Your Partner

Founded in 1982, Gantner is a pioneer in RFID/NFC-based solutions used across a wide range of industries. Gantner systems create a unique and smart employee experience in many different ways.

Through innovative smart locker systems, Gantner enables, optimizes, and simplifies modern office workplaces. Employee ID cards or smartphones become contactless keys, wherever lockers, cabinets, personal storage compartments, or mailboxes are used.

With thousands of installations worldwide, a proven portfolio of products and solutions, and experienced local teams, Gantner is a leading developer of electronic locker locking solutions.

Security

From hardware to software, security is a top priority at Gantner. Robust systems, encrypted data transmission, and reliable access rights management provide comprehensive protection.

ISO 27001 confirms our high standards for information security and underlines our commitment to the highest security and data protection standards. We are also SOC 2 audited and comply with the legal requirements of the CRA and NIS 2.

Sustainability

Sustainability is a key consideration for Gantner, from development through to manufacturing. Long-lasting products, efficient processes, and the responsible use of resources help reduce environmental impact.

ISO 14001 provides the framework for our environmental management system. In addition, we offset CO_2 emissions from Scopes 1–3 and are EcoVadis-certified. This enables us to meet the highest European sustainability standards.

Everything from a Single Source

Full-Service

With Gantner, you're in the best hands. Our solutions stand for innovation, durability, and reliability. Together with our partners, we support you from planning and implementation through to service and support. With our own hardware and software, we are happy to assist you worldwide.

Consultation

We analyze your individual requirements and work with you to develop the ideal solution for your club.

Design

Our experts develop a tailored concept that carefully considers all technical and economic factors.

Installation

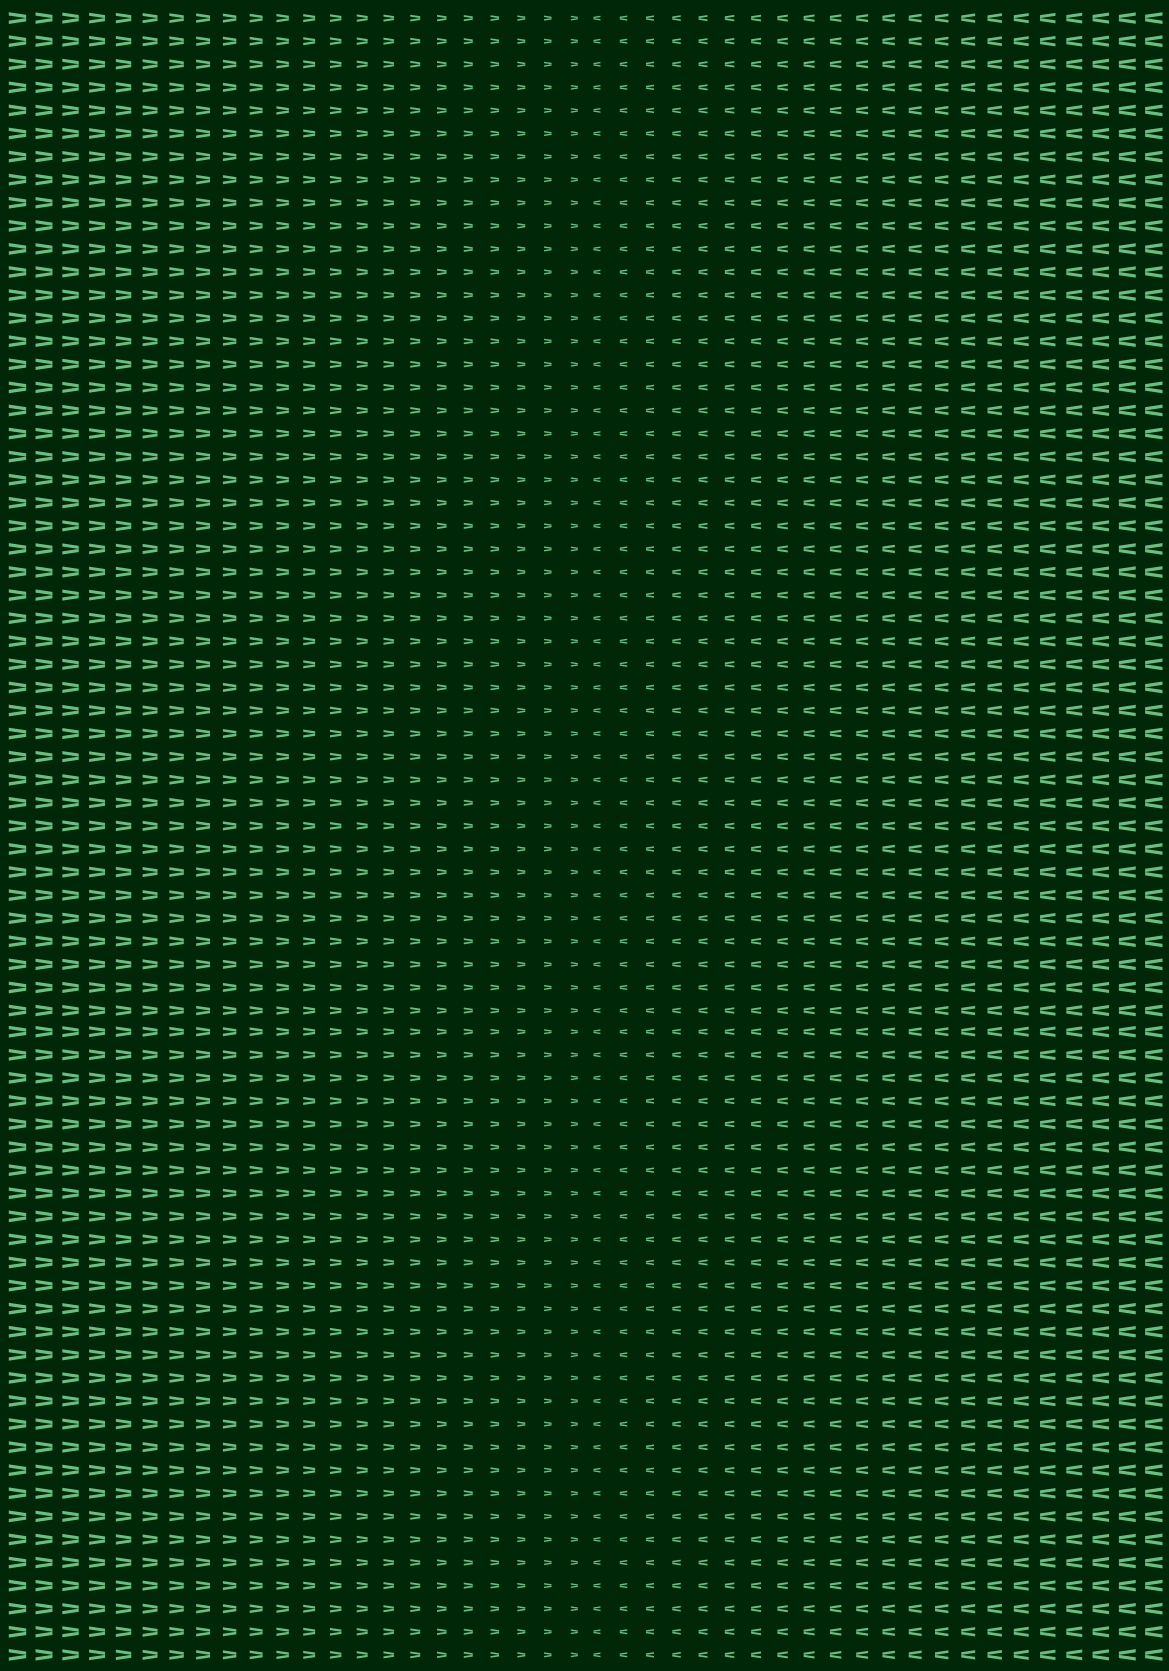

Our experienced team and partner network ensure a smooth and professional installation.

Commissioning

Following installation, your new system is professionally commissioned to ensure its full functionality.

Service

Even after commissioning, we're here for you with customized services, maintenance, and ongoing support.

Solutions

We offer thoughtfully designed, future-proof solutions that are perfectly tailored to your individual requirements.

New Requirements for Modern Workplaces

Changing Work Environments

Hybrid working, working from home, and flexible workplace models are changing the requirements of modern offices. Companies need to use office space more efficiently while creating a working environment that supports collaboration, flexibility, security, and well-being. This also applies to coworking spaces and shared office infrastructure.

Intelligent workplace concepts help companies design office spaces according to demand and use resources efficiently. At the same time, an attractive working environment is becoming an increasingly important factor in attracting and retaining qualified employees.

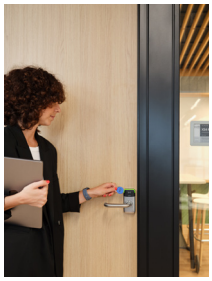

The Solution

Everything with a Single Credential

With a smartphone or personal employee ID, various applications throughout the company can be accessed easily and conveniently. At the same time, administrative workload and processes are reduced.

Biometric solutions take this a step further, enabling secure access without the need for a physical credential.

Secure Access Control

Smart Access Solutions

A comprehensive workplace concept requires convenient and secure access control. Salto complements Gantner's solutions with modern, wireless access technology, enabling seamless, keyless access to office and building areas. From the underground car park and main entrance to offices, meeting rooms, and shared spaces, access rights can be managed flexibly and tailored to individual requirements.

Centralized management of these access rights enables efficient identity management (IDM). Roles and access rights can be managed easily and clearly, while permissions can be assigned automatically and flexibly adapted to different requirements.

Digital Experience

Integrated access solutions enhance convenience and customer satisfaction. Biometric identification provides fast and secure access.

Automated Processes & Analytics

Automated processes and valuable insights for optimal space utilization.

Maximum Flexibility and Visibility

Depending on customer requirements, the right platform enables flexible management and scaling of the access control infrastructure.

Enhanced Security

Keyless solutions provide reliable access control with 24/7 logging.

Personal Storage for Flexible Working

Employee Lockers

In flexible workspaces, employees need personal storage space for documents, work materials, and personal belongings. Electronic employee lockers provide secure and convenient storage options, regardless of where employees work. Flexible allocation concepts and intelligent locking solutions enable lockers to be used according to demand. They also ensure efficient use of available space.

Fully Integrable

The locker locking system can be integrated into the access control system or a workplace app.

Big Data

GDPR-compliant real-time data transmission enables optimized and efficient use.

Green Responsibility

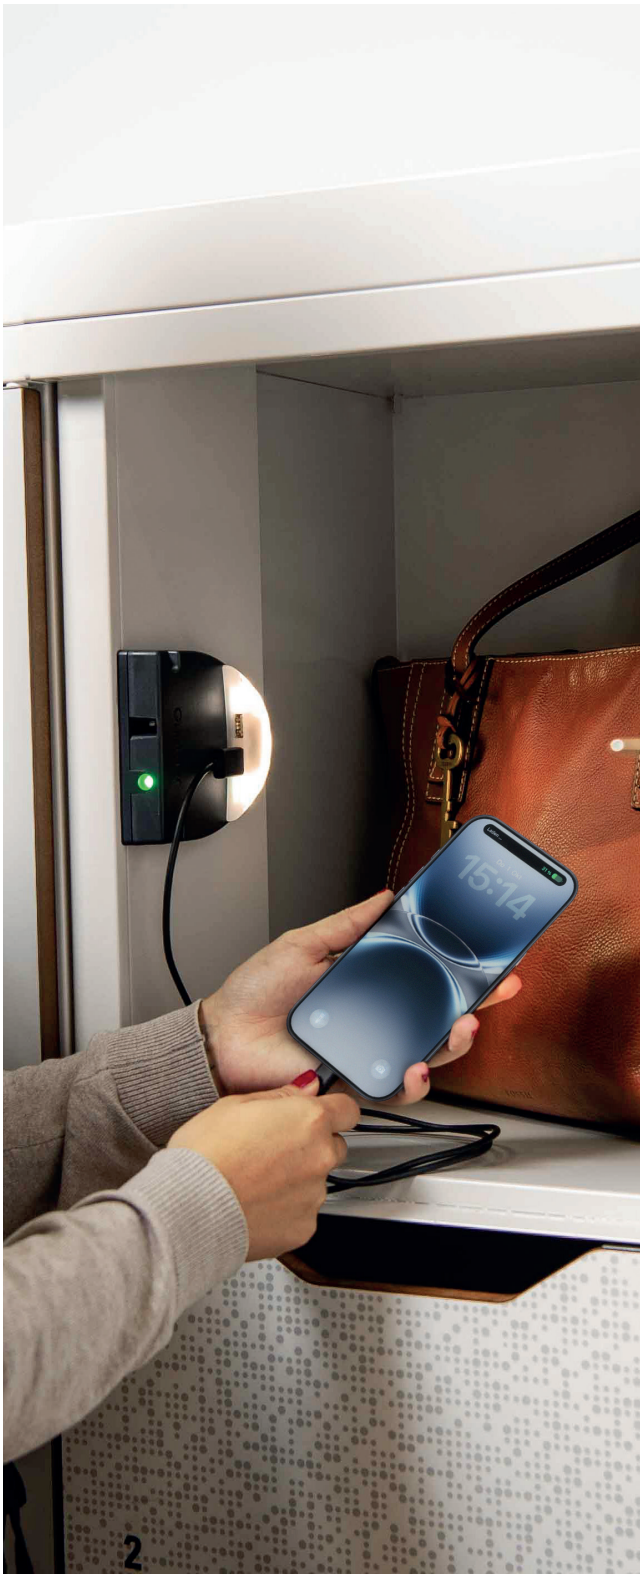

Maintenance-free operation supports environmentally friendly building strategies.

Securely Stored. Easily Accessible.

Visitor Lockers

Electronic visitor lockers provide secure and convenient storage for personal belongings during a stay. The PIN code option can be used without an RFID or NFC credential. Intuitive operation and clear step-by-step instructions on the terminal make the lockers particularly easy to use. Visitors can quickly and easily store and retrieve their personal belongings.

High Security

Robust mechanics and encrypted data transmission ensure secure operation.

Transparency

The management software provides a transparent overview of locker usage at all times.

Easy-to-use

Intuitive locker operation ensures a fast, seamless, and positive visitor experience.

Start the Workday in Comfort

End-of-Trip

Whether by bike, on foot, or by public transport: modern workplaces support flexible and sustainable commuting. Gantner's electronic locker locking systems provide secure storage for clothing and personal belongings and can be conveniently accessed using an employee ID card or smartphone. This makes the changing area a seamless part of a modern workplace concept.

Flexible Use

Lockers can be assigned to different user groups.

Smart Processes

Time-controlled automatic opening prevents unnecessary locker occupancy and ensures capacity is available whenever needed.

Easy to Retrofit

Existing lockers can easily be upgraded to a smart locker locking system.

LX Suite Workflow Platform

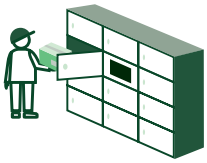

Internal Logistics

The growing diversity of handover and logistics processes presents companies with major challenges. The LX Suite offers a secure, convenient, and easy-to-manage solution for these requirements. As a workflow-driven smart locker platform, LX Suite enables the secure and controlled handover of packages, documents, and other items. Automated workflows for notifications, bookings, and tracking ensure transparent processes and secure, identity-based handovers. This helps conserve resources, optimize workflows, and sustainably improve service for employees, visitors, and service providers.

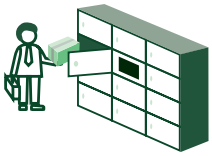

Four Simple Steps

Creat Booking

Drop Off

Collection

Confirmation

Role-Based

Access permissions are automatically managed based on the respective user role.

Automation

Defined time windows and real-time tracking enable flexible handover and collection.

User-Friendly

Quick access via PIN, QR code, or RFID credential.

Central Administration and Management

Locker Management Software

Efficient management is essential for the smooth operation of modern locker locking systems. The right management software helps streamline administrative processes and centrally manage lockers, users, and access permissions. Depending on requirements, different solutions are available – from serverless and on-premise solutions to cloud-based applications.

Flexible and scalable software solutions enable convenient management, easy integration, and reliable maintenance of locker locking systems. They are suitable for installations of any size and can be operated from anywhere.

Stand-alone / On-Premise / Cloud

From stand-alone solutions without a software platform to cloud-based solutions – the customer decides.

Flexible Options

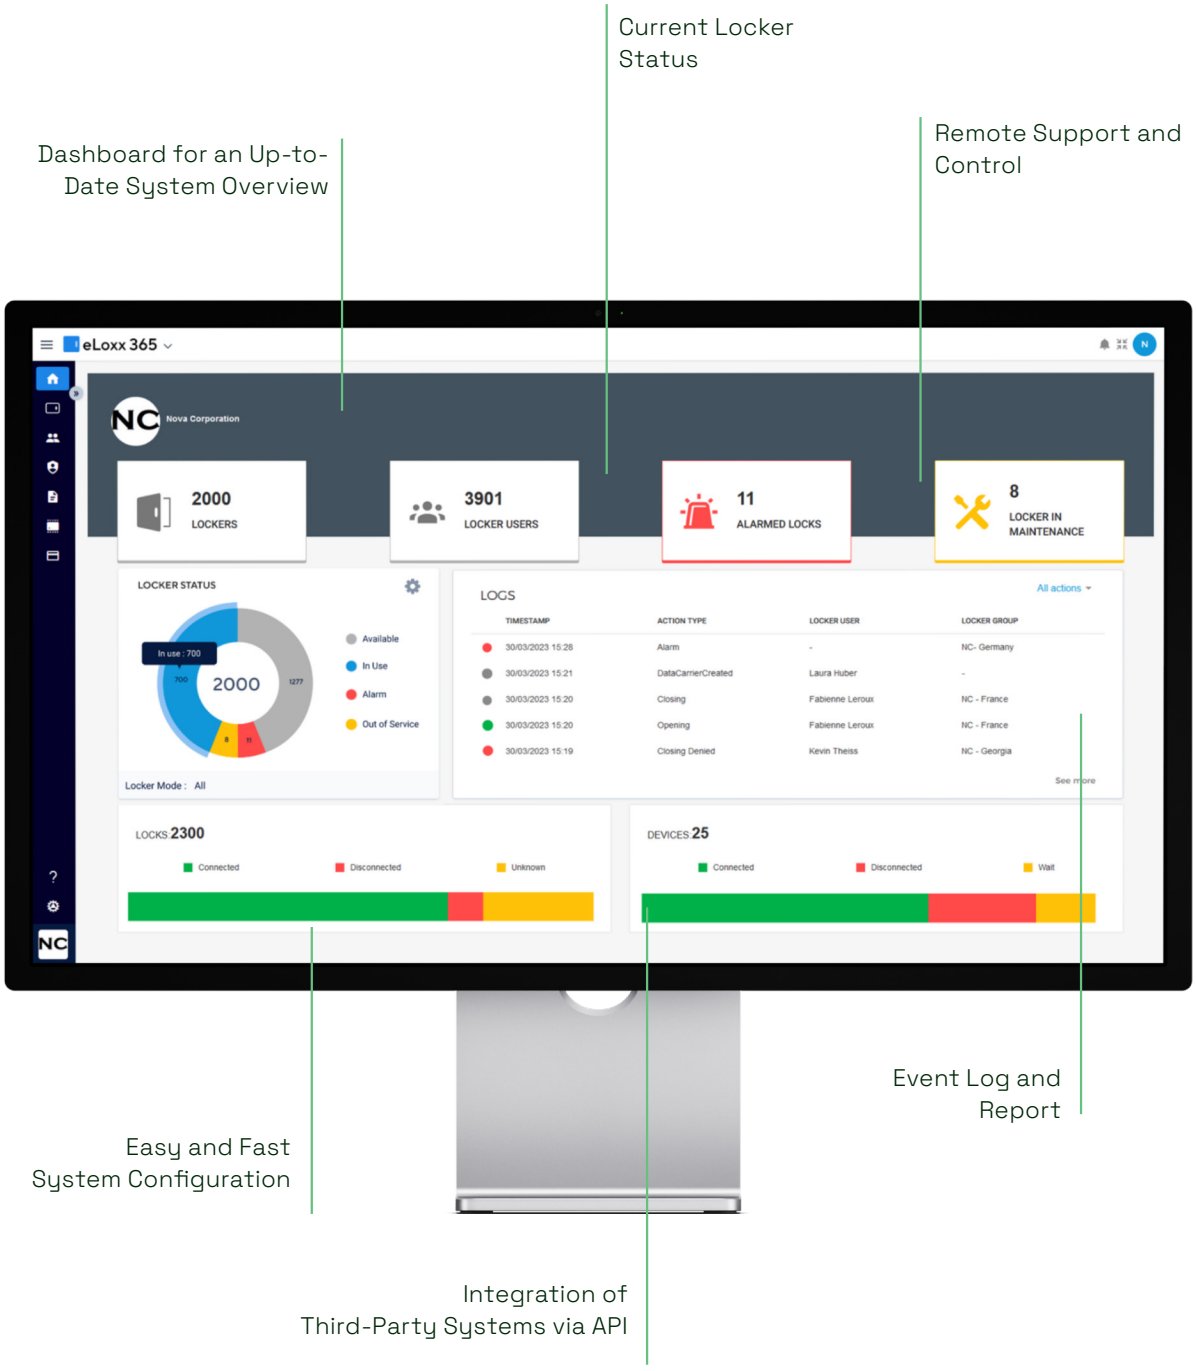

Different solutions for all industries, applications, and project sizes.

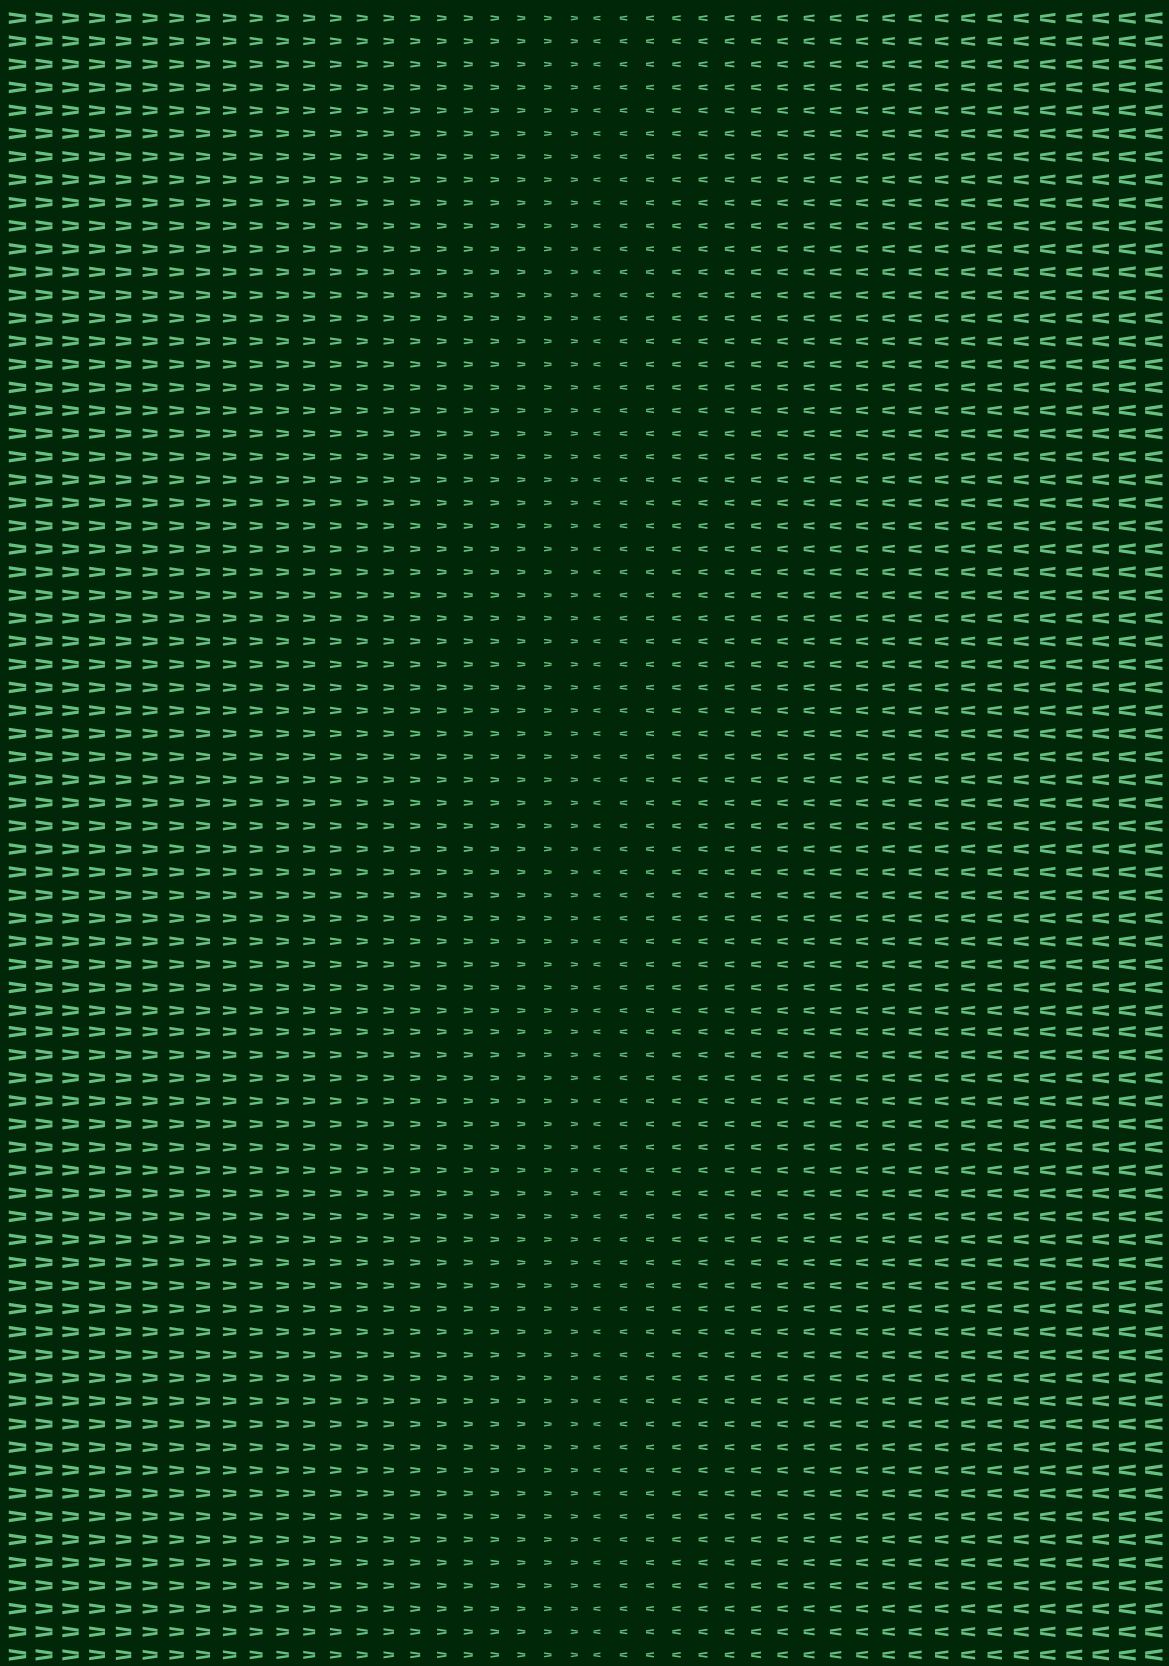

Latest Software Technology

Tested software modules with high security standards

Web Interface

Intuitive web interface for everyday use.
