

The proven battery-powered lock with push-button access

## ECO.Lock

Simple to operate with a clear visual status indicator through the push-button position. Perfect for upgrading existing card and coin-operated locks.

Every locker becomes smart and intuitive to use. Simply tap your data carrier on the button to lock or unlock. The button's position provides a clear visual indicator of whether the locker is securely closed.

Forgotten locker numbers can be easily checked at the info terminal, and lost data carriers can be quickly replaced. No keys or coins are needed.

Wireless connectivity via BLE.Connect allows centralized monitoring and management of the ECO.Lock system.

### 1:1 Retrofit

Identical mounting holes to card and coin locks make upgrades quick and hassle-free.

### Robust

Impact-resistant housing and motorized locking for intensive everyday use.

### Future-Proof

BLE.Connect enables seamless integration with the eLoxx Relaxx management software via the lock's wireless interface.
