

## MoLA - Mobile Locker Administration

The smart and fast way to configure battery locks.

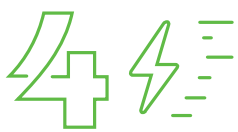

### One-tap to configure locks

No messy cables. No laptop to carry.  
Tap and configure locks in seconds!

### Can't configure closed lockers? No more!

Configure lock and read lock events even when the locker is closed.

### Configure at bolt speed

Power to configure locks 4x<sup>1)</sup> faster with mobile than using laptop. Possibility to bulk configure locks.

### It's easier with mobile

New staff can get started with configuring locks quickly. Delegate with ease<sup>2)</sup>.

### Worried about battery life of the locks?

MoLA can help you optimise the battery life of your locks.

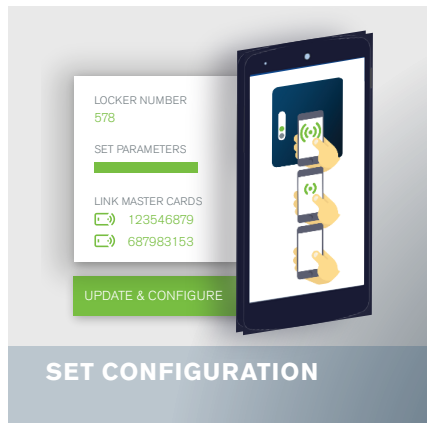

### Secure and reliable working

Requires authenticating with app key so only the right people can configure.

<sup>1)</sup> When tested under monitored conditions, MoLA configures 100 locks in 4 minutes. Whereas, GAT ConfigManager configures 100 locks in 15 minutes.

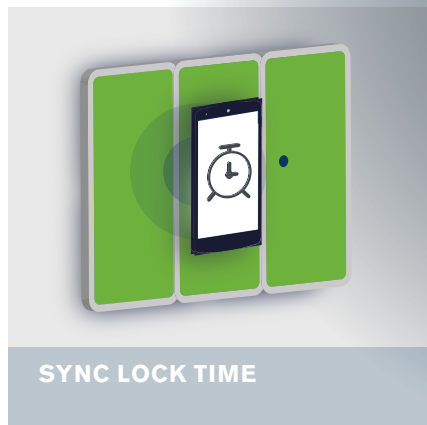

<sup>2)</sup> No need for multiple app keys. Possibility to securely multiply the app key in MoLA & spread the workload among several staff members.

# HOW MoLA WORKS

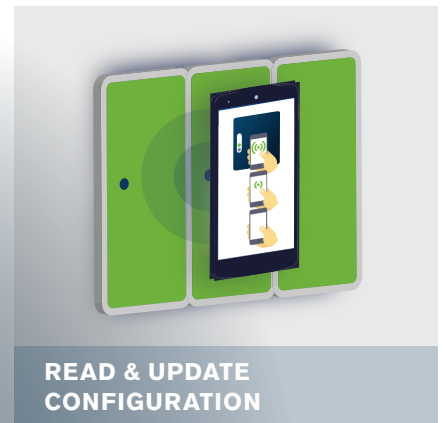

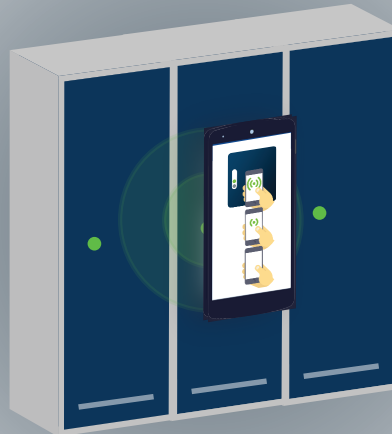

## SET CONFIGURATION

Set lock parameters, link master cards & RFID readers.

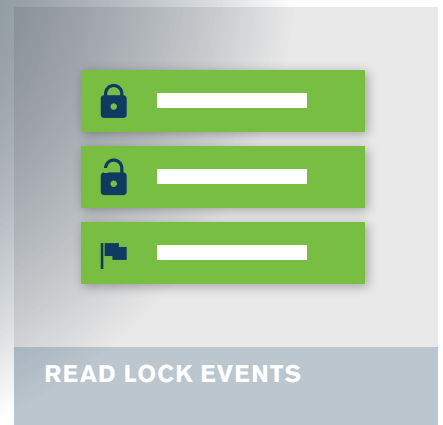

## SYNC LOCK TIME

Sync lock time with the device time.

## READ & UPDATE CONFIGURATION

Edit & apply modified lock parameters on the fly.

## READ LOCK EVENTS

View when the lock was opened or closed using master card & more.

## SUPPORTED HARDWARE

GAT ECO.Lock 7100 F/ISO series  
(firmware version 2.4.0 or higher)

GAT ECO.Side Lock 7010 F/ISO series  
(firmware version 2.1.0 or higher)

GAT ECO.Side Lock 7000 BA series  
(firmware version 2.4.0 or higher)

Android

NFC

## SUPPORTED HARDWARE

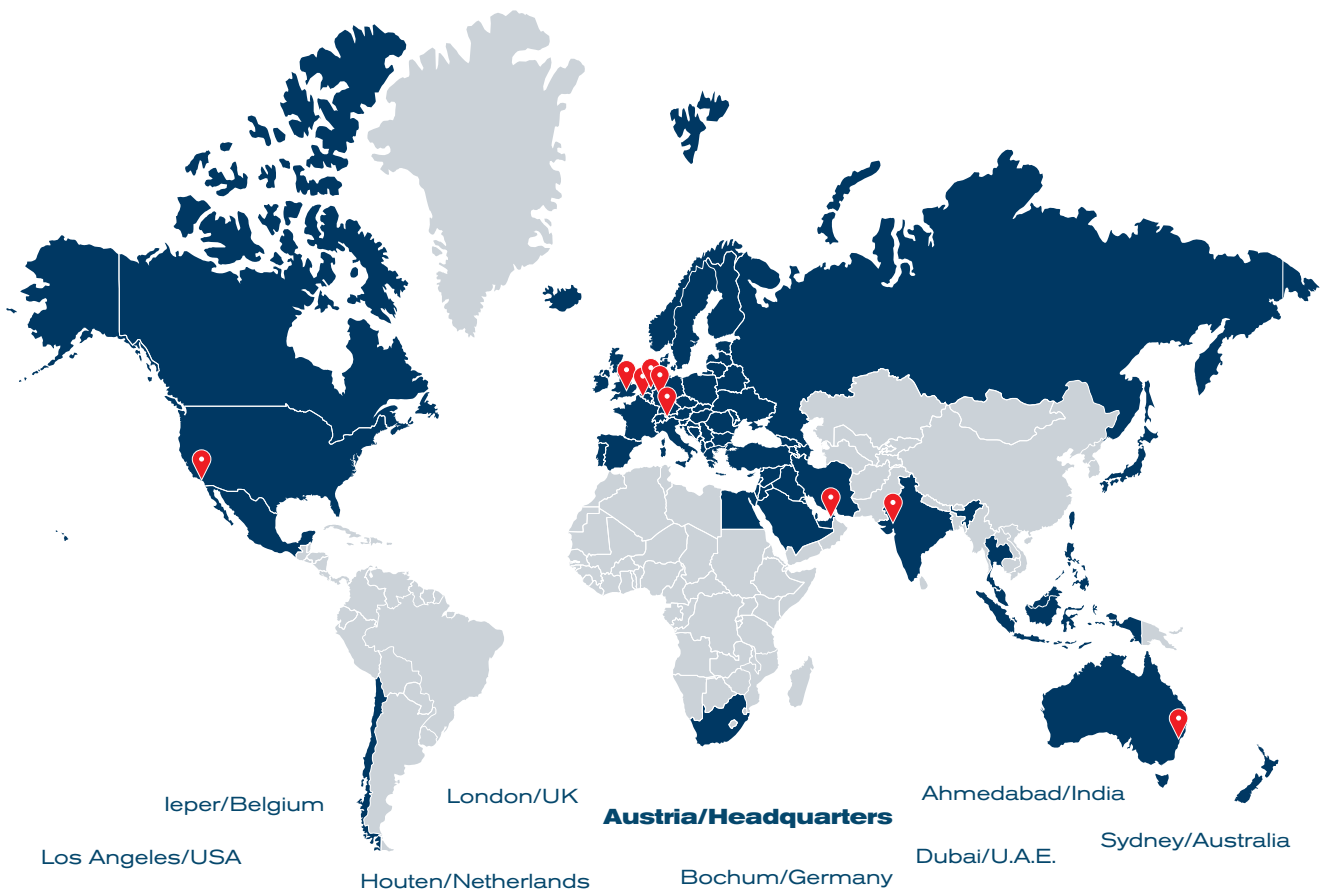

### What do I need to use the MoLA app?

- NFC enabled Android phone
- Android OS 4.4.0 or above
- The device must not be rooted

To allow the app to configure your locks, you need the APP KEY datacarrier included in the GAT ECO.Basic set. Due to technical limitations in iOS, this app is currently not available on Apple devices.

### How do you ensure security?

An APP KEY is always required in order to configure your locks. Once loaded in MoLA, the APP KEY is expiring. When the session expires, the APP KEY is automatically wiped off from your device. This prevents the APP KEY from being accessed by unintended third party apps, malware and so on. Moreover, until the APP KEY is validated again, the on-site locks cannot be configured.
